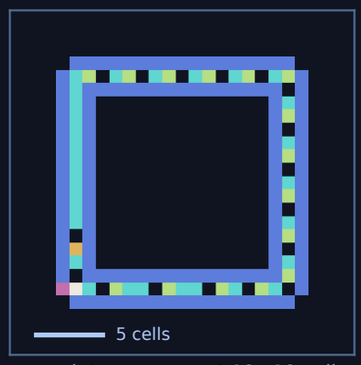
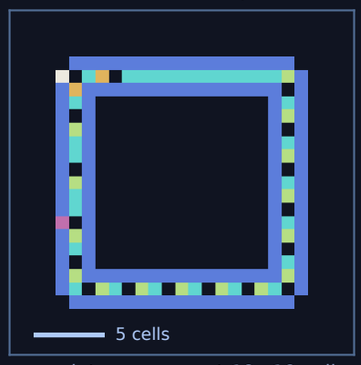
Omitted sources produce stable registered descendants · EXP-score-coverage-001

V03-development-1-D
source t=800; isolation delay 0



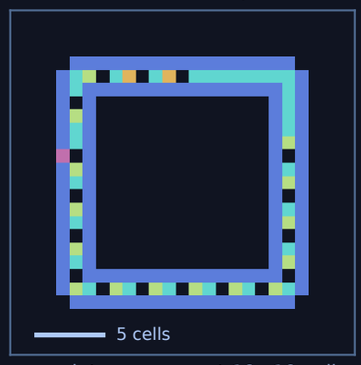
unknown isolated source

complete component 19×19 cells



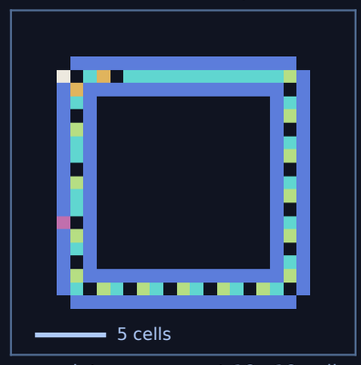
child 1: V03
detached +400 updates

complete component 19×19 cells



child 2: V03
detached +410 updates

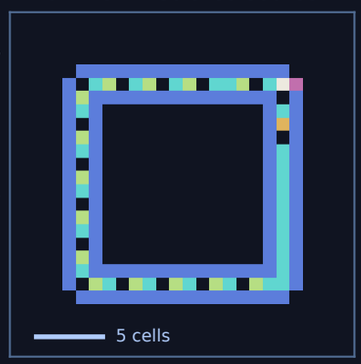
complete component 19×19 cells



child 3: V03
detached +420 updates

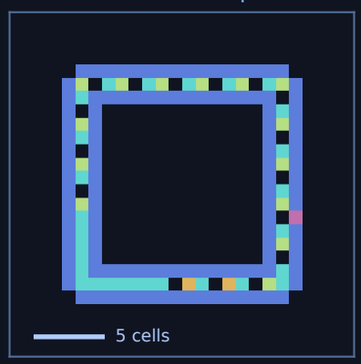
complete component 19×19 cells

RV01-confirmation-1-D
source t=1200; isolation delay 0



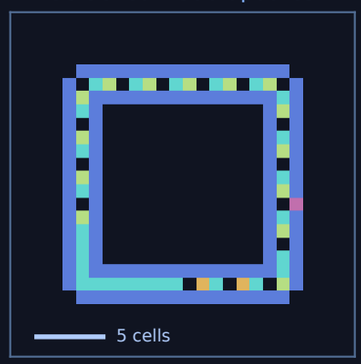
unknown isolated source

complete component 18×18 cells



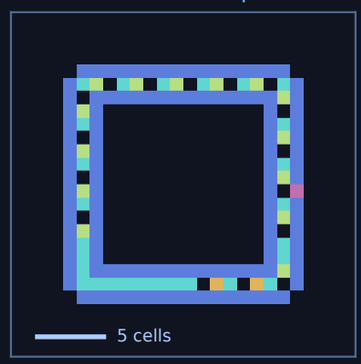
child 1: V01/RV01
detached +370 updates

complete component 18×18 cells



child 2: V01/RV01
detached +390 updates

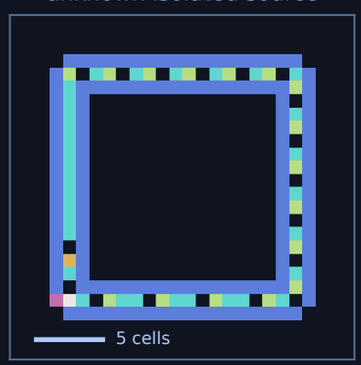
complete component 18×18 cells



child 3: V01/RV01
detached +390 updates

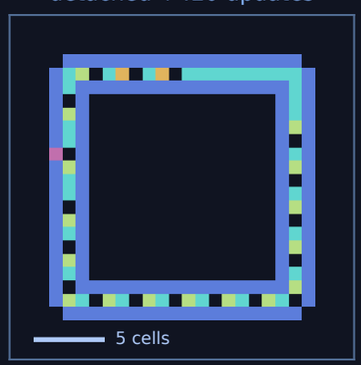
complete component 18×18 cells

RV02-confirmation-0-D
source t=1200; isolation delay 0



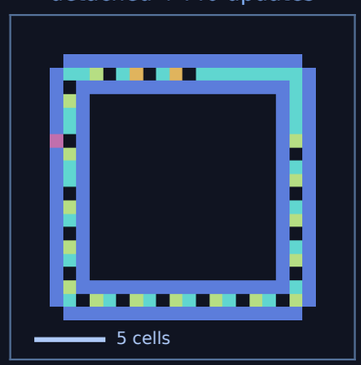
unknown isolated source

complete component 20×20 cells



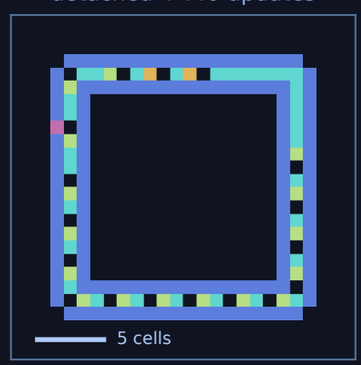
child 1: RV02
detached +420 updates

complete component 20×20 cells



child 2: RV02
detached +440 updates

complete component 20×20 cells



child 3: RV02
detached +440 updates

complete component 20×20 cells

Recorded complete components retain arms, spacing and chirality; literal cell-state colors; equal cell geometry in every panel.
Each child is detached under declared serial isolation; the final two edges preserve the registered descendant identity.
First delay-zero positive per recovered identity, illustrated after acquisition. Source genotype remains unknown; no native parentage or benefit assigned.
